

MATH 210 - EXAM 1

The exam 1 practice set contains 112 questions. I ranked the questions as Necessary (N), Recommended (R), and Skip (S). Unfortunately, you will find many of the questions necessary. Some of the questions use the same set up. This means you won't have to start from scratch everytime. Work your way through the necessary list first, and then work on the recommended list.

The list is below.

Necessary: 1 2 3 4 6 7 10 11 12 13 14 16 17 19 20 21 22 23 24 26 27 19 30 32 33 34
